MATERIAL SAFETY DATA SHEET
DMSO- DIMETHYL SULFOXIDE
December 4, 2013

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: Dimethyl Sulfoxide (DMSO) CHEMICAL NAME: Dimethyl Sulfoxide

SYNONYMS/TRADE NAMES: Enviro S®, dimethyl sulphoxide, methyl sulfoxide, sulfinylbis [methane]

MOLECULAR FORMULA: C₂H₆OS MOLECULAR WEIGHT: 78.13
USE of the substance: Solvent for manufacture of pharmaceuticals, fine chemicals and polymers.

SUPPLIER:
Sanco Industries
1819 S. Calhoun St.
Fort Wayne, IN 46802

EMERGENCY HEALTH, SAFETY & ENVIRONMENTAL INFORMATION, CALL:
Sanco Industries Inc., LLC  888-697-2626 (8:00 am - 5:00 pm EST)

EMERGENCY TRANSPORTATION INFORMATION, CALL:
CHEMTREC (800) 424-9300

OTHER INFORMATION, CALL: Sanco Industries Inc.  888-697-2626

2. COMPOSITION/INFORMATION ON INGREDIENTS

NTP/IARC/OSHA CARCINOGEN: No
EC Classifications (R or S phrases): None Required

3. HAZARDS IDENTIFICATION

WARNING! COMBUSTIBLE LIQUID AND VAPOR

PHYSICAL APPEARANCE: Clear liquid
ODOR: Essentially odorless

EFFECTS OF OVEREXPOSURE:

General: DMSO has shown very few toxic symptoms in humans. The most common are nausea, skin rashes and an unusual garlic-onion-oyster smell on body and breath.

Inhalation: High vapor concentrations may cause headache, dizziness, and sedation.

Eyes: Low hazard for usual industrial/commercial handling by trained personnel.

Skin: Stinging and burning of the skin as well as rashes and vesicles have been seen. A heat reaction may occur if applied to wet skin. Avoid contact with DMSO solutions containing toxic material or materials whose toxicological properties are not known. DMSO easily penetrates
the skin and may enhance the rate of skin absorption of skin-permeable substances. But because of DMSO's low toxicity and its inability to carry less-permeable substances with it through the skin, it can be concluded that DMSO does not pose a significant threat by skin absorption.

**Ingestion:**
A low ingestion hazard.

**HMIS AND NFPA HAZARD RATINGS:** Health - 1, Flammability - 1, Chemical Reactivity - 0

*Note:* HMIS and NFPA ratings involve data and interpretations that may vary from company to company. In both cases the lower the number, the less the hazard. They are intended only for rapid, general identification of the magnitude of the specific hazard. To deal adequately with the safe handling of this material, all the information contained in this MSDS must be considered.

### 4. FIRST AID MEASURES

**NEVER GIVE FLUIDS OR INDUCE VOMITING IF PATIENT IS UNCONSCIOUS OR IS HAVING CONVULSIONS.**

**General advice:**
Remove contaminated clothing promptly (laundry before reuse).

**Eye Contact:**
Flush thoroughly with running water (including under eyelids) for at least 15 minutes. If irritation persists after flushing, seek medical attention.

**Skin Contact:**
Wash contaminated skin with water. Seek medical attention if irritation persists.

**Ingestion:**
Seek immediate medical care. Do not induce vomiting.

**Inhalation:**
Remove to fresh air. If breathing has stopped, provide artificial respiration, keep the victim warm and seek medical attention.

**Special advice:**
In general, DMSO is not dangerous to people, but like any other chemical, it should be treated with care, respect and common sense.

### 5. FIRE-FIGHTING MEASURES

**Combustible liquid and vapor**

**Extinguishing Media:**
Foam, carbon dioxide, dry powder, and water spray.

**Special protective equipment for fire-fighters:**
Wear a self-contained Breathing Apparatus (SCBA).

**Special Exposure Hazards:**
Burning dimethyl sulfoxide produces poisonous gases (sulfur oxides). Wear rubber gloves, SCBA, and rubber suit.

**Flashpoint and method:**
89°C (192°F) closed cup
95°C (203°F) open cup

**Flammable Limits (% in air):**
LEL: 3.0 - 3.5% by volume
UEL: 42 - 63% by volume

**Autoignition Temperature:**
300-302°C (572-575°F)

**Spill, Leak, or Release:**

*Note:* Review sections 3, 4, and 5 of this MSDS before proceeding with clean up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean up.
6. ACCIDENTAL RELEASE MEASURES

Personal Precautions:
In case of mist formation use a respirator or Self-Contained Breathing Apparatus (SCBA).

Environmental Precautions:
If a spill or leak occurs, immediately consult your environmental supervisor. Remove ignition sources. Ventilate the area. Do not breathe the vapor or get liquid in eyes or on skin/clothing.

Spill Clean-up Methods:
Dilute and flush to wastewater treatment or absorb with inert material. Do not allow the material to enter streams or waterways.

Recommended Decontamination Facilities:
Eye bath, water washing facilities

7. HANDLING AND STORAGE

Usage/Handling Precautions:
Keep away from sources of ignition. No Smoking. Do not breathe vapor or mist. Avoid contact with skin, eyes, or clothing.

Storage Precautions:
Keep container tightly closed, in a well-ventilated place. Freezes (solidifies) at 18°C (64°F)

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Limits:
ACGIH Threshold Limit Value (TLV): not established
OSHA (USA) Permissible Exposure Limit (PEL, 1989 Table Z-1-A values or section-specific standards): not established
AIHA Workplace Environmental Exposure Level “WEEL” guideline for airborne concentrations in the workplace: 250 ppm (8-hr TWA)

Ventilation:
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Use process enclosures, local exhaust ventilation, or other engineering controls to maintain ventilation.

Respiratory Protection:
In case of mist formation use a respirator. Respirator type: organic vapor cartridge, SCBA or SAR. If respirators are used, a program should be instituted to assure compliance with OSHA standard 29 CFR § 1910.134.

Hand Protection/Protective clothing:
Butyl rubber or nitrile (NBR) rubber gloves. Rubber apron and boots if splash hazard.

Eye Protection:
Safety glasses with side shield, tight-fitting goggles or face shield.

9. PHYSICAL AND CHEMICAL PROPERTIES

**Appearance:** colorless liquid

**Odor:** essentially odorless

**Odor Threshold:** not available

**pH:** 8.5 (50/50 in water)

**Boiling Point:** 189°C (372°F)
Flashpoint and method: 
89°C (192°F) closed cup 
95°C (203°F) open cup

Flammable Limits (% in air):
LEL: 3.0 - 3.5% by volume
UEL: 42-63% by volume

Autoignition Temperature:
300-302°C (572-575°F)

Vapor Pressure:
0.55 mbar (0.46 mmHg) @ 20°C (68°F)

Specific Gravity:
1.1 at 20°C (68°F) (water = 1)

Solubility in water at 20°C:
miscible

Octanol/Water Partition Coefficient:
logPow = -2.03

Viscosity at 25°C (77°F):
2.0 mPas or cP

Vapor Density (Air = 1):
2.7

Evaporation rate (n-butyl acetate = 1):
0.026

Melting Point:
18°C (64°F)

Sensitivity to Static Discharge:
Material is unlikely to accumulate a static charge, which could act as an ignition source.

10. STABILITY AND REACTIVITY

Stability: Stable
Conditions to avoid: Prolonged heating above 150°C (302°F) can cause rapid, exothermic decomposition
Materials to avoid: Organic and inorganic acid chlorides, strong oxidizing agents, alkali metals, hydrobromic acid, acidic solutions of alkali bromides
Hazardous decomposition products: Sulfur dioxide, formaldehyde, mthyl mercaptan, dimethyl sulfide, dimethyl disulfide, and bis (methylthio) methane
Hazardous polymerization: Will not occur. No stabilizers are needed or present.

11. TOXICOLOGICAL INFORMATION

Data for Dimethyl Sulfoxide:
Acute Toxicity Data:
Oral LD-50 (male rat): 14,500-28,300 mg/kg
Inhalation (rat): No mortality rate @ 2,900 mg/m³ (900 ppm)/ 24 hrs.
Dermal LD-50 (rat): 40,000 mg/kg
Skin irritation (human): Mild
Repeated skin application (human): Slight irritation
Skin sensitization (human): None by EC protocols
Eye irritation (human): None by EC protocols

Subchronic Toxicity Data:
Oral study (13 weeks, rat): LOEL = 8800 mg/kg/day (minor target organ effects: liver)
(reduced body weight gain): NOEL = 1100 mg/kg/day
Inhalation study (13 weeks, rat): NOAEL = 0.964 mg/L (302 ppm)

** Note - definitions for data:
LOEL = lowest observed effect level NOAEL = no observed adverse effect level NOEL = no observed effect level.

Developmental Toxicity Data:
DMSO is not considered to be directly embryotoxic and has been shown to be a successful cryoprotectant for mammalian semen and embryos.
A mouse teratology NOEL of 12 g/kg/day has been established based on research with a 50% DMSO solution administered orally. Teratology data suggests that:
1. DMSO is not a teratogen to mammals when administered via oral and dermal routes at dose level that do not produce overt maternal toxicity.
2. DMSO is not a teratogen at low dose levels regardless of the route of administration.
3. The teratogenic potential of DMSO is dependent on route of administration, the dose level and the gestational time of exposure, but in all cases is extremely low or non-existent.

**Mutagenicity/Genotoxicity Data:** Salmonella typhimurium assay (Ames test): negative (+/- activation). DMSO is used as a neutral solvent in the Ames mutagen test.

### 12. ECOLOGICAL INFORMATION

**Introduction:**
This environmental effects summary is written to assist in addressing emergencies created by an accidental spill which might occur during shipment or handling of this material. It is not meant to address discharges to sanitary sewers or publicly owned treatment works.

**Aquatic Toxicity:**
The LC$_{50}$ (96 hrs.) for ten species of fish range from 32,500 to 43,000 ppm. The LC$_{50}$ for two species of protozoans are 32,000 and 38,000 ppm. The concentration required to inhibit growth (EC$_{50}$) for five species of blue-green algae and one green algae species ranged from 0.4 to 4.0%. DMSO is non-bio-accumulating since the log of the octanol/water partition coefficient is $-2.03$.

**Phytotoxicity:**
Soaking tomato, cucumber, and bean seeds for 18hrs in up to 8% DMSO solutions had no effect on germination rate. DMSO has no effect on the growth rate of corn when sprayed on at rates up to 30 gallon/acre. When diluted with a large amount of water, release of DMSO, directly or indirectly, to the environment is not expected to have significant effect.

**Biological Oxygen Demand:**
- Theoretical Oxygen Demand at 10 ppm: 123 mg oxygen
- Chemical Oxygen Demand at 10 ppm: 107 mg/l
- Biological Oxygen Demand-5 at 10 ppm: $\leq 1.0$ mg/l

### 13. DISPOSAL CONSIDERATIONS

**Disposal Methods**

**Waste Disposal:**
Dilute and flush to an approved wastewater treatment system. Bacterial decomposition of dimethyl sulfoxide during wastewater treatment can result in the release of dimethyl sulfide (a volatile substance with a strong disagreeable odor). Waste DMSO can also be incinerated in an approved furnace where permitted. Consult federal, state or local authorities for proper disposal procedures.

**Empty Containers:**
Should be transported/delivered using a registered waste carrier for recycling or waste disposal in accordance with local regulations.

### 14. TRANSPORT INFORMATION

**DOT (USA) Status:**
- **Bulk (>119 gallons per container)**

**Proper shipping name:** Combustible liquid, N.O.S. (Dimethyl Sulfoxide)

**Hazard Class:** Combustible liquid

**I.D. Number:** NA 1993

**Packing Group:** III

**Reportable Quantity:** N/A

**Placards:** 1993 (Combustible)

**Quantity limitations:** None
Drum (<119 gallons per container)
Proper shipping name: Dimethyl Sulfoxide
Hazard Class: Not regulated
I.D. Number: None
Packing Group: None
Label(s): None
TDG (Canada) Status: unregulated.
ICAO - International Civil Aviation Organization status: unregulated
IATA - International Air Transport Agency status: unregulated
ADR and IMDG - International Dangerous Goods status: unregulated

15. REGULATORY INFORMATION

This document has been prepared in accordance with the MSDS requirements of the OSHA Hazard Communication Standard 29 CFR 1910.1200.

Occupational Safety and Health Administration “OSHA” hazardous chemical(s): Dimethyl sulfoxide

Material(s) known to the State of California to cause cancer: None
Material(s) known to the State of California to cause adverse reproductive effects: None
Massachusetts Substance List: None
New Jersey Workplace Hazardous Substance List: None
Pennsylvania Hazardous Substance List: None

This document has been prepared in accordance with the MSDS requirements of the WHMIS Controlled Products Regulation.

WHMIS (Canada) Ingredient Disclosure List: Listed
WHMIS9 (Canada) Status: Regulated
WHMIS (Canada) Hazard Classification: B/3 – Combustible Liquid
IARC - International Agency for Research on Cancer Carcinogenicity Classification (components present at 0.1% or more): Not Listed
ACGIH - American Conference of Governmental Industrial Hygienists: Not Listed
NTP - National Toxicology Program: Not listed

Reporting requirements of Section 313 or Title III of the superfund Amendments and Reauthorization Act (SARA) of 1986 and 40 CFR Part 372: None

SARA (U.S.A.) Sections 311 and 312 hazard classification(s): fire hazard
TSCA - US Toxic Substances Control Act: This product is listed on the TSCA inventory.
CEPA/DSL - Canadian Environmental Protection Act/ Domestic Substances List: Listed.
EINECS - European Inventory of Existing Commercial Chemical Substances: No. 200-664-3

AICS/NICNAS - Australian Inventory of Chemical Substances/National Industrial Chemical notification and Assessment Scheme: This product is listed on AICS.
Japanese Handbook of Existing and New Chemical Substances: Listed.
ICH (International Council on Harmonization): Class III – Solvent with low toxic potential

16. OTHER INFORMATION

US/CANADIAN Label Statements:
WARNING!
COMBUSTIBLE LIQUID AND VAPOR
HIGH VAPOR CONCENTRATIONS MAY CAUSE DROWSINESS
Store away from heat and light.
Distill with caution.
Keep away from heat and flame.
Avoid breathing high vapor concentrations.
Keep container tightly closed.
Use with adequate ventilation and proper protective equipment given elsewhere in this MSDS.

**FIRST AID:**
If inhaled, move to fresh air. Treat symptomatically. Get medical attention if symptoms persist.

**IN CASE OF FIRE:**
Eliminate all ignition sources. Flush spill area with water spray. Prevent runoff from entering drains, sewers, and streams.
Since emptied containers retain product residue, follow label warnings even after container is emptied.

**CAUTION:**
FOR MANUFACTURING, PROCESSING OR REPACKAGING BY TRAINED PERSONNEL

MSDS Issue Date: December 4, 2013
