

Koi Worx Muck Reducer is a safe, non-toxic muck and sludge reducer for backyard, garden, and koi ponds. The tablets are designed to sink to the bottom of the pond and begin working on deep sludge deposits caused from dead algae, leaves, and fish waste. The tablets are a blend of natural beneficial bacteria. Each container contains approximately 145 tablets. Tablet count will vary because container is filled by product net weight and each tablet varies in size/weight.

DIRECTIONS FOR USE:

Use 12 tablets to treat 500 gallons of water. Apply Koi Worx Muck Reducer tablets once a month when water temperatures are above 50°F. For ponds with heavy muck buildup (6 inches or more) apply every 2 weeks until desired results are achieved. This product can be used simultaneously with all other Koi Worx products. ***It is recommended that ponds be adequately aerated while using this product. Overdosing can cause loss of oxygen due to muck and sludge rapidly breaking down.**
