

24.5% GLUFOSINATE

24.5% Glufosinate is a nonselective water-soluble herbicide for emerged annual and perennial grasses, broadleaf weeds, and some woody species. This product works best when weeds are actively growing.

% ACTIVE INGREDIENTS

Glufonsinate-ammonium......24.5%

PACKAGING

Quart, Half Gallon, Gallon, 2.5 Gallon

PRODUCT BENEFITS

- Contains glufosinate, which can kill the toughest of weeds and grasses
- Absorbs on contact and starts working immediately
- Can be applied as a spot application or broadcast spray
- Will not lose effectiveness with rain (Rainproof within 10 minutes)
- Only affects growth that is sprayed directly

APPLICATION INFORMATION

Spot treatment: Mix 2 to 4 fl. oz. per gallon of water depending on the weed and its stage of growth. *

Broadcast treatment: Apply 2 - 6 quarts per acre depending on the weed and its stage of growth. *

*See label for details.
