

LAWN WEED KILLER

Lawn Weed Killer utilizes a combination of three active ingredients to form an herbicide that controls a variety of hard-to-kill broadleaf weeds such as dandelion, clover and plantain. Lawn Weed Killer has been demonstrated through university trials to be an effective solution that can be applied to both cool and warm season grasses, and is labeled for use on turf, sod farms, right-of-ways and other non-crop industrial areas.

PRODUCT BENEFITS

- Combined power of three selective herbicides
- Low odor formulation with flexible application rates
- For use on both cool and warm season grasses
- May be applied to woody brush in non-cropland areas

NON-TURF APPLICATION

Roadsides (including aprons and guardrails), right-of-way and other similar non-crop areas:

For control of broadleaf weeds, mix at a rate of 1.5 to 3.5 qts of product per acre. This may require 50 - 300 gallons of water per acre. For woody plants, apply to both stems and foliage of completely matured plants until they start to go dormant.

Woody Brush: Add 1 - 1.5 gallons of this product per acre to wet all parts of the brush foliage, stem and bark. This may require up to 200 - 600 gallons of water per acre.
