

# STEP-BY-STEP POND MAINTENANCE

**Step 1 Pond Dye** (*Crystal Blue, Ocean Blue, Sapphire Blue & Black Out*)

**Step 2 Pond Bacteria** (*Natural Pond Cleaner & Muck Doctor*)

**Step 3 Algae Control** (*Crystal Plex, Copper Sulfate, Green X, Bloom Buster*)

**Step 4 Submerged Weed Control** (*Tsunami DQ*)

**Step 5 Emerged Weed Control** (*CattPlex Pro*)

Pond Dye	Pond Bacteria	Algaecide	Herbicide	Herbicide
Crystal Blue enhances the color of your pond or lake all year long. Choose from 3 colors blue, blue-green, or black pond dye.  Apply February-November for early season treatment.	Natural Pond Cleaner safely and effectively breaks down muck and dead vegetation. Muck Doctor will reduce muck levels in targeted areas.  Apply February-November for early season treatment.	Crystal Plex kills algae and maintains water quality. When algae currently exists, start with Crystal Plex or Copper Sulfate.  Apply April-September for filamentous and planktonic algae control.	Tsunami DQ kills submerged weeds that are copper sulfate resistant. When weeds currently exist, start with Tsunami DQ.  Apply April-September for weed control.	CattPlex Pro kills emerged rooted weeds down to the root. Specially formulated for cattail control. When emerged weeds exist, start with CattPlex Pro.  Apply April-September for cattail control.

*Plex Mate is a non-toxic surfactant that aids in penetration of aquatic herbicides and algaecides. Plex Mate should be used when treating floating and emerged aquatic weeds.*

**KEY**

- Natural Pond Cleaner
- Muck Doctor
- Crystal Plex
- Tsunami DQ
- CattPlex Pro

Each point on the key represents the product that treats the problem.

# IDENTIFY GROWTH BEFORE YOU TREAT

Correctly identifying the growth, having the right products, and knowing how much to use are the key elements in transforming your pond into the best feature on your property. Refer to the chart below as a guideline to help ID your pond growth and product needs.
